**DETAILED ACTION**

***Election/Restrictions***

Applicants' "Preliminary Amendment" filed on March 17, 2005 has been considered.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, drawn to a system comprising pricing inputting means for inputting a price of the parts; part price storing means; prescribed price inputting means for inputting a prescribed price to be compared with the inputted price of the parts; prescribed pricing storing means; and selecting means for comparing the inputted price with the stored prescribed price.

Group II, claim(s) 2, drawn to a system comprising size inputting means; part size storing means; prescribed size inputting means; prescribed sizing storing means; and selecting means for comparing the inputted size with the stored prescribed size.

Group III, claim(s) 3, drawn to a system comprising lead time inputting means; part lead time storing means; prescribed lead time inputting means; prescribed lead time storing means; and selecting means for comparing inputted lead time with the stored prescribed lead time.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I includes pricing inputting means; part price storing means; prescribed price inputting means; prescribed pricing storing means; and selecting means for comparing the inputted price with the stored prescribed price which is lacking in Groups II and III.

Group II includes size inputting means; part size storing means; prescribed size inputting means; prescribed sizing storing means; and selecting means for comparing the inputted size with the stored prescribed size which is lacking in Groups I and III.

Group III includes lead time inputting means; part lead time storing means; prescribed lead time inputting means; prescribed lead time storing means; and selecting means for comparing inputted lead time with the stored prescribed lead time which is lacking in Groups I and II.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
